# RE-CIRCULATING AIR DRYER

The air dryer is especially used in the industries to dry out the extra moisture and water from the final end product. They are sometimes even used during the process to remove excess moisture and dry out the substance. We are the leading manufacturer of re-circulating air dryer for your industry. They are made in sync with the standards accepted in the industries and are even customized as per clients need.

# ACID FUME EXTRACTION SYSTEM

The process of scrubbing, galvanizing, etc. produces fumes that need to be extracted from the plant. We provide a wide range of acid fume extraction system to reduce the risk of releasing the harmful gas into the atmosphere. These systems have a water spray that is continuously sprayed on the gas to make the water soluble and prevent it from getting mixed with the atmosphere.

# STORAGE TANKS FOR INDUSTRIAL USES

The industries that manufacture liquid and free flowing materials need special storage tanks to effectively store the substance. We present various kinds of storage tanks for industrial usage. The storage tanks come in different shape and size depending on the quantity of material that is to be stored. The material of the tank is selected based on the type of substance to be preserved.

# TRANSMISSION LINE TOWER PLANT

The transmission line tower needs to be of high quality to ensure great functionality even in temperature changes. This stability is obtained through the zinc layer that is done on the entire surface. We have great expertise in the transmission line tower plant manufacturing that is used in many galvanizing plants.

# POWDER COATING PLANT

The powder coating plant is used in various industries to coat the substance with a uniform layer of substance. We manufacture the plants from best grade raw materials and are fabricated using latest technology. The powder coating plant we offer are appreciated in the market for its durability, efficiency and durable performance.

# ARVIND CORROTECH SPECIALTY

- Pickling Tank
- Polypropylene Tanks
- Pickling Tanks
- Flux Cleaning System
- Flux Heating System
- Chemical Storage Tanks
- Effluent Treatment Tank
- Degreasing Tank
- Pre Treatment Tank
- 7 Tank Treatment Plant
- Copper / Brass Plating Plant
- Coil Pickling Plant
